

WEB-BASED ACCESS & SECURITY

IS100 | A simple cost-effective solution.

IMRON Corporation, a leader in systems integration solutions for Security and Access Control, has developed **IS100** a web-based application specifically designed for the latest hardware platform by **HID, VertX™**. **IS100-VertX** empowers businesses to manage all security needs from a simple browser interface. Integrate access control with video including DVRs and NVRs, IP-based Cameras, Alarm Systems, Central Stations and much more. With no software to install and easy to use browser based controls, **IS100-VertX** requires minimal training. Best of all, the system is economical for 2 to 64 doors making **Imron** the choice for access and security.

Take advantage:

- **Easy** - No software installation
- **Economical** - No dedicated PC
- **Simple** - Minimal instruction/reduced training time
